Company Profile

2026

One Stop IT Services for
Procurements and IT Solutions.

Introduction

Rivara Technologies is a dynamic IT company, spearheaded by seasoned professionals with extensive experience in the Information and Communication Technology (ICT) sector.

We specialize in delivering comprehensive IT Services, alongside robust solutions in General Trading, Emergency Response, and Procurement of Goods.

In 2025, Rivara tech recruited promising young talent from USM (Universitas Saintek Muhammadiyah), to excel and innovate within our fields.

We are committed to navigating the rapidly evolving information technology landscape with agility, continuously exploring technological advancements to provide efficient products and services that deliver exceptional value in terms of labor, time, and cost for the business world

Asset Management Scanner App

Professional, enterprise-grade Asset Intelligence Hub. Designed to bridge the gap between static master data and real-time field operations.
By providing a high-fidelity, AI-powered ecosystem for tracking, managing, and analyzing organizational assets. It transforms raw data (from CSVs and scans) into actionable intelligence.

"Compare the importance of Sponsorship vs Program manuals using a scale of 1 to 20, and show me a chart of the results.
The Official Manual emphasizes adherence to operational standards, procedures, ethics, and compliance (Sample Indonesia's core principles). While Sponsorship manuals may support external partnerships, Program manuals are critical for ensuring internal compliance with the policies outlined in the Official Manual.

bagaimana implementasi policy perlidungan anak terhadap regulasi kominfo terbaru?
Tidak ada informasi dalam [Official Manual] atau [Verified Experience] yang secara eksplisit menjelaskan implementasi kebijakan perlindungan anak terhadap regulasi Kominfo terbaru. Namun, secara umum, implementasi kebijakan perlindungan anak harus mematuhi prinsip-prinsip regulasi Kominfo terkini, seperti:
Kepatuhan terhadap kebijakan data pribadi
